1. The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest the subject matter of claims 1 - 3 and 5 - 20 for the reasons of record. With regard to newly presented claims 21 - 34, although the prior art discloses pulse oximeters having reduced power consumption configurations (see Kaluza, Swedlow, for example- all previously cited), the prior art does not teach or suggest a method of modifying power consumption in an oximeter that includes operating the oximeter with an increased duty cycle or increasing overlap in data blocks being processed based at least in part on determination that a transition event should occur, in combination with the other claimed steps.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
